

NETSHIFT PRESS RELEASE

NETSHIFT SIGNS RESELLER AGREEMENT WITH MEXICAN INTEGRATOR

Leading public network access solution provider, NetShift has concluded a reseller agreement with its Mexican distributor, Kioscosnet .

Kioscosnet recently launched its Internet Kiosk Franchise offering complete solutions for under US\$3,000 per kiosk for a minimum installation of four kiosks after initial franchise fees. These payments include all technical and publicity training, online support, software and licences as well as the expertise of one of Mexico's original Internet kiosk companies. Kiosks are based on NetShift's acclaimed software platform that provides a robust, resilient, reliable and secure networked operating environment.

Kioscosnet has extensive experience in successfully implementing Internet kiosk solutions based on the NetShift version 5 software platform. The company's team of professional designers and programmers has developed a wide range of applications for kiosks including the Photo email program that enables users to send photos and a virtual postcard from any suitably equipped kiosk. Kioscosnet has also developed remote administrative software and remote status monitors using web database technologies enabling kiosks to provide complete information on usage and status to franchisees and sponsors.

Kioscosnet Internet Kiosk Franchise is now available in Mexico and the company is seeking international partners in Latin America and Europe through master franchises and exclusive contracts.

About NetShift

NetShift is among the leading solution providers of public access/self service kiosk technology in the world. With a deployed base in over 70 countries, NetShift and its global network of resellers are providing solutions and professional services to organisations producing and operating kiosks, ATM's, multimedia payphones, gaming devices and many other self service devices. NetShift solutions are available for individual devices and networks of thousands of devices for information (route planning, tourist information, museum guides etc.), communication (Internet, email, vmail, SMS, telephony etc.) and entertainment (gambling terminals, fun games, online tournaments etc.). NetShift solutions can be seen in leading organisations worldwide in markets as diverse as eGovernment (City Of Rhode Island, Library Of Congress, UK Post Office), Retail (IBM, Macy's), Transport & Tourism (Ordnance Survey Mapping, UK National Trust), Financial Services (Merrill Lynch, Charles Schwab, HSBC, JP Morgan), Hospitality (Marriott Hotels, Hilton Hotels, Hyatt Hotels), Telecoms (Cable & Wireless, France Telecom) and much more.
